## Responsibility

We put great emphasis on quality in order to deliver first-class products, services and solutions to our customers. During production, we use only the latest technologies and highest quality components. We produce all our products in the Czech Republic under the supervision of experienced engineers and inspectors to meet world quality standards.

## Effectiveness

Effective use of our extensive business and technical knowledge and experience has allowed us to apply new services, products and applications to the market which bring original and smart solutions to our customers while maintaining as favorable a ratio between quality and price as possible.

## Innovation

We believe that there is always a better and more effective solution. We follow latest trends and customer requirements and make use of this knowledge when developing and improving our products, services and processes, so that we can always exceed your expectations.

## Partnership

Our future depends on our partners, which is why we focus on your needs and always offer the most optimal solutions. Our aim is to build mutually beneficial long-term relationships.

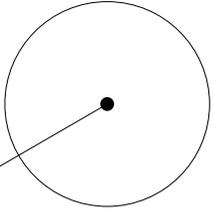

Together we aspire to be the best

# Our Core Values

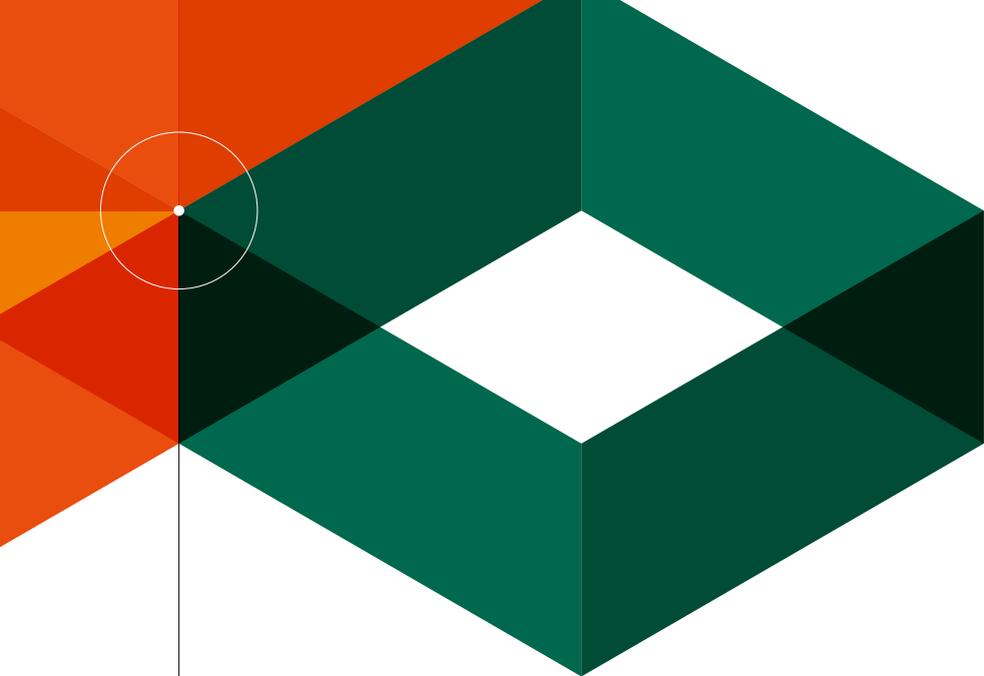

## Globally Recognized Certification

Quality is our priority, therefore we do everything to ensure that our products are among the best available on the market, matching the services provided by our company. We aim to provide our customers with the highest possible added value. For this reason, we apply strict ISO 9001 quality management standards at Conteg. All our products undergo a strict testing regime to obtain TÜV certificates. Our technical expertise is ensured by certificates such as CDCDP, DCDC etc.

Conteg products are meticulously constructed from quality materials, which comply with technical and environmental specifications and are thoroughly tested and inspected prior to leaving our manufacturing facility. You can be assured that when purchasing a Conteg product you have selected a product of the highest quality and reliability.

# Emphasis on Quality

Delivering a Comprehensive

# Solution

## For Enterprises

We offer our customers a complete range of products from telecommunications and data racks to solutions for data centers, server rooms and small applications. Our racks, which have a wide range of accessories, are designed to perfectly match all IT requirements. In addition to cabinets, racks and their accessories, we also offer cable management, cooling systems, power distribution units, aisle containments, and monitoring systems as well as design assistance and implementation services.

## For Data Centers

Building a data center is a very complex process, requiring knowledge of other disciplines such as cooling and power systems, security, monitoring and supervision. Correct layout ensures your satisfaction in terms of safety issues, energy consumption, uptime and countless other areas. The Conteg team has extensive experience in working out designs and proposals. Our design services include consultation on all sizes of projects, from basic layouts to office server rooms to large scale data centers.

## For Industry

Industrial enclosures are mainly used for power distribution in low-voltage industrial buildings, electrical substations, office complexes, outdoor and other applications. The content and use of these cabinets is very diverse and varies according to application: power enclosures, cabinets for machines, control panels for automation, and some serve other purposes.

Features of our product lines include variability, wide range of accessories and great compatibility with customer solutions. Our enclosures are made of steel, stainless steel or aluminium with a powder-coated finish.
